Organisation

College of Europe – European Legal Studies

EU Law is a multifaceted, rapidly developing and fascinating area of the law. To ensure its students' excellence, the College's Law Department established a balance between the economic and constitutional aspects of European Law.

College of Europe – European Economic Studies

The Economics Department teaches an incisive analysis of the important economic and business issues of Europe to ensure the development of its students' practical, debating and empirical statistical skills.

Organised by the College's ELEA option

The ELEA option highlights the interaction and interdependence between the European Economic Studies and European Legal Studies departments in the areas of competition and market regulation. It is composed of students from both fields who aim to cooperate to analyse law and policy-making in the EU.

Students of the ELEA Option
