SFI INFORMAL SEMINAR

Building Policies around Increasing Returns in AI

Thibault Schrepel, Universiteit
Amsterdam/Stanford

Thursday, April 3, 2025 @ 12:30 p.m. (MT)
Noyce Conference Room

Join via Zoom

Abstract: How can we build adaptive, flexible policies for a constantly evolving technology? That's the question policymakers and enforcers are asking today in the context of Generative AI. This talk will explore how complexity economics, and in particular, the concept of increasing returns, can help us craft policies that are both robust and inherently dynamic, i.e., suited to an ecosystem that scales rapidly.

Host: Will Tracy

The [Santa Fe Institute](#) is a nonprofit research center located in Santa Fe, New Mexico. Its scientists collaborate across disciplines to understand the complex systems that underlie critical questions for science and humanity. The Institute is supported by philanthropic individuals and foundations, forward-thinking partner companies, and government science agencies.
